Wrangling and Analyzing Data

Wrangle Report

This report describes Data Wrangling that happened in this project.

We've wrangled the dataset (WeRateDogs) from Twitter API. WeRateDogs is a Twitter account. The rating are in the form of improper fractions such as: (11/10, 12/10,13/10) and etc.… This account has more than 4 million followers. The entire project was made by the Udacity Project workplace (in the classroom). This report is written by Microsoft Word.

The Data Wrangling Process is a three-step process:

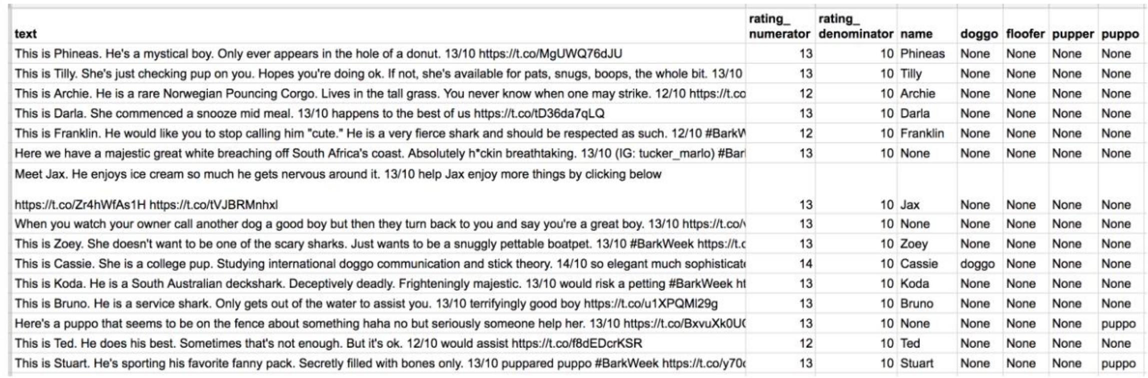
(GAC)

1- Gather
2- Assess
3- Clean

We have gathered from three sources:

1- Enhanced twitter Archive (CSV)

The WeRateDogs Twitter archive contains basic tweet data for all 5000+ of their tweets, but not everything. One column the archive does contain though: each tweet's text, which I used to extract rating, dog name, and dog "stage" (i.e. doggo, floofer, pupper, and puppo) to make this Twitter archive "enhanced." Of the 5000+ tweets, This Dataset was uploaded from the Workspace via this link: https://d17h27t6h515a5.cloudfront.net/topher/2017/August/59a4e958_twitter-archive-enhanced/twitter-archive-enhanced.csv



text	rating_ numerator	rating_ denominator	name	doggo	floofer	pupper	puppo
This is Phineas. He's a mystical boy. Only ever appears in the hole of a donut. 13/10 https://t.co/MgUWQ76dJU	13	10	Phineas	None	None	None	None
This is Tilly. She's just checking pup on you. Hopes you're doing ok. If not, she's available for pats, snugs, boops, the whole bit. 13/10	13	10	Tilly	None	None	None	None
This is Archie. He is a rare Norwegian Pouncing Corgo. Lives in the tall grass. You never know when one may strike. 12/10 https://t.co	12	10	Archie	None	None	None	None
This is Darla. She commenced a snooze mid meal. 13/10 happens to the best of us https://t.co/tD36da7qLQ	13	10	Darla	None	None	None	None
This is Franklin. He would like you to stop calling him "cute." He is a very fierce shark and should be respected as such. 12/10 #BarkW	12	10	Franklin	None	None	None	None
Here we have a majestic great white breaching off South Africa's coast. Absolutely h*ckin breathtaking. 13/10 (IG: tucker_marlo) #Bar	13	10	None	None	None	None	None
Meet Jax. He enjoys ice cream so much he gets nervous around it. 13/10 help Jax enjoy more things by clicking below https://t.co/Zr4hWfAs1H https://t.co/tVJBRMnhxl	13	10	Jax	None	None	None	None
When you watch your owner call another dog a good boy but then they turn back to you and say you're a great boy. 13/10 https://t.co/	13	10	None	None	None	None	None
This is Zoey. She doesn't want to be one of the scary sharks. Just wants to be a snuggly pettable boatpet. 13/10 #BarkWeek https://t.c	13	10	Zoey	None	None	None	None
This is Cassie. She is a college pup. Studying international doggo communication and stick theory. 14/10 so elegant much sophisticat	14	10	Cassie	doggo	None	None	None
This is Koda. He is a South Australian deckshark. Deceptively deadly. Frighteningly majestic. 13/10 would risk a petting #BarkWeek ht	13	10	Koda	None	None	None	None
This is Bruno. He is a service shark. Only gets out of the water to assist you. 13/10 terrifyingly good boy https://t.co/u1XPQMl29g	13	10	Bruno	None	None	None	None
Here's a puppo that seems to be on the fence about something haha no but seriously someone help her. 13/10 https://t.co/BxvuXk0U	13	10	None	None	None	None	puppo
This is Ted. He does his best. Sometimes that's not enough. But it's ok. 12/10 would assist https://t.co/f8dEDcrKSR	12	10	Ted	None	None	None	None
This is Stuart. He's sporting his favorite fanny pack. Secretly filled with bones only. 13/10 puppared puppo #BarkWeek https://t.co/y70	13	10	Stuart	None	None	None	puppo

The extracted data from each tweet's text

2- Image Prediction File

It's produced by every image in the account (WeRateDogs). One more cool thing: I ran every image in the WeRateDogs Twitter archive through a a neural network that can classify breeds of dogs. The results: a table full of image predictions (the top three only) alongside each tweet ID, image URL, and the image number that corresponded to the most confident prediction. This dataset was uploaded via Udacity Classroom: **https://d17h27t6h515a5.cloudfront.net/topher/2017/August/599fd2ad_image-predictions/image-predictions.tsv**

Tweet image prediction data

3- Additional Data via the Twitter API

It's obtained by querying Twitter API. It is stored in a txt file (tweet-json). It is provided by Udacity classroom.

- Assessing Data

  After gathering, we assess the data visually and programmatically. It is for quality and tidiness issues.

  A)Tidiness:

  - Dog stage separated 4 columns
  - Data related but divided 3 data frames

  B)Qualify

  - 1.181 retweets (retweeted_status_id)
  - Invalid tweet_id data type
  - missing entries 2354 not 2356
  - 23 rating not equal 10 (denomerator)
  - row 313 o denomerator
  - underscores used in mult words names

- missing photos 2075 rows not 2356
- some P namesstart with upper case other with lowercase

- Cleaning Data

After Assessing, We start to clean the data. It’s cleaned by pandas data frames.
